

THE ADVENT SCHOOL ENGINEERING AND  
DESIGN SUMMER PROGRAM PRESENTS:

# RADICAL INVENTORS

Press a pedal. Turn a crank. We make sculptures move!  
Throughout this session we will:

Seek inspiration from kinetic inventors like Calder,  
Ganson, and Jansen.

Design moving machines made from wire, bicycle parts,  
and other found objects.

Create a gigantic mobile, a cityscape using light and  
shadow, or a miniature circus.

**June 17 to June 28**

**OPEN TO STUDENTS AGES 5 TO 12 BY SEPTEMBER  
1, 2019**
