

THE ADVENT SCHOOL ENGINEERING
AND DESIGN SUMMER PROGRAM
PRESENTS:

FROM HERE TO THERE

July 22 - August 2

What if you could zip line from your bedroom to school? Take a quick trip to Mars? Or hop on a waterslide from your roof to an ice cream shop?

Join us this session to discover how designers from around the world are developing wild technologies that get us where we want to go! High speed tunnels! Autonomous vehicles! What will you create?

Designers will also investigate how we transfer information and electricity while they program robots and explore circuitry.

Open to 5 to 12 year olds by September 1, 2019

Please contact us, at summerprogram@adventschool.org or 617-742-0520 x 49 with any questions.
